

# 3CX Phone System

Your business phone, anywhere

## Why 3CX?

3CX is a software-based, open-platform, VoIP (Voice over Internet Protocol) phone system that works on premise or in the cloud. With 3CX you will have a full-featured phone system that includes call queues, built-in video calls and web conferencing. All these features are remote-friendly, so you and your staff can use them from anywhere, anytime.

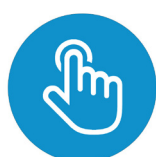

## Why upgrade?

Due to ongoing changes in communications and the continual improvement and reliability of NBN services, your current phone system may benefit from an upgrade to the award winning hosted 3CX Phone System. Making the switch to a hosted PABX phone system will typically lower costs and increase your business's communications mobility and productivity.

## Benefits

**Cost savings**

**Ease of use**

**Increased Security**

**Increased Productivity**

**Improved Collaboration**
