

Minder Secure Cloud Services

About

Minder Cloud refers to a network of secure servers located in the Equinix Data Centres in Sydney. We migrate on-premises servers to a hosted environment to increase speed and help us effectively and quickly troubleshoot any problems.

Instead of businesses having to purchase expensive equipment that will depreciate and fault, moving to the cloud is like renting your own e-space with all your hosted services on it.

Benefits

Availability
Designed for 99% uptime

Security
World-class backups & disaster recovery capabilities

Scalability
Increase or decrease server quantities based on business growth

Cost reductions
No hardware upgrades or ongoing maintenance costs
